**DETAILED ACTION**

***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(c), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(c) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 8/20/10 has been entered.

***Priority***

2. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 10/724,317, filed on 11/26/03.

***Drawings***

3. The drawings were received on 4/14/10. These drawings are not acceptable.

***Specification***

4. The amendment filed 4/14/10 is still objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure for the same reasons as set forth in Section 3 of the last office action, dated 4/30/10. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. Applicant asserts on pages 8-10 of the Remarks that the changes are logical and the mistakes are due to idiom translation. However, Examiner respectfully disagrees. The specification as originally filed does not create any logical conflict at all. For example, Number 4 in Figure 11 can mean either outputting 1 or more unfiltered pictures following the picture specified by the filter application information. However, the

amendment filed 4/14/10 changes the scope of the invention by requiring the output to include both the specified unfiltered picture and all pictures following the specified picture clearly introduced new matter into the disclosure.

Applicant is required to cancel the new matter in the reply to this Office Action.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

7. Claims 26-28 and 32-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's admitted prior art (AAPA) in view of Kiyoshi et al (JP 63-199589) for the same reasons as set forth in Section 5 of the last office action, dated 4/30/10.

8. With respect to the newly added limitations, applicant is required to cancel the new matter in the reply to this Office Action. However, even if applicant asserts no new matter is added, Kiyoshi et al still meets the claims in their broadest reasonable sense in that the selector 3

teaches the well known concept of continuously selecting decoded picture before the filtering 5 and the filtered picture after the filtering 1 as specified by the filtering application information.

***Response to Arguments***

9. In response to applicant's argument on page 11 of the Remarks that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., improving deterioration of film texture produced by film grains throughout the entirety of a video) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).
